" ARBORIVITAL MEDICINE."

UNDER the above title Dr. Cooper contributes to *The Hahnemannian Monthly* of January the first of a series of papers, the subject of which he has touched upon in his articles in our last and present numbers. We have received various expressions of opinion—approving and the opposite—as to Dr. Cooper's views, which, as he is well aware, are open to criticism on many points. We shall reserve our own comments until Dr. Cooper has completed his case.
